# DELICATE STRENGTH

Realism is one of the strong points of the surface, which faithfully reproduces the veins and shading typical of beola stone. Surface roughness and quartz crystals create the same sparkling effects as natural stone.

Il realismo è uno dei punti di forza della superficie, che riproduce fedelmente le venature e le sfumature tipiche della beola. Asperità superficiali e cristalli di quarzo creano gli stessi effetti di riflessione luminosa della pietra naturale.

Le réalisme est un des points forts de cette surface qui reproduit fidèlement les veines et les tonalités typiques de la beola. Les aspérités superficielles et les cristaux de quartz créent les mêmes reflets lumineux de la pierre naturelle.

Uno de los puntos fuertes de la superficie es el realismo ya que reproduce fielmente las vetas y los matices típicos de la beola. Asperezas superficiales y cristales de cuarzo crean los mismos reflejos de luz de la piedra natural.

Beeindruckender Realismus ist eine der starken Seiten der Oberfläche, die die für den Beola typischen Adernungen und Nuancen getreu wiedergibt. Oberflächige Unebenheiten und Kristallquarze erzeugen die gleichen Lichtreflexe wie der Naturstein.

Реализм – одна из главных характеристик коллекции, которая с точностью воспроизводит прожилки и цветовые оттенки камня Beola. Шероховатость поверхности и кварцевые кристаллы рождают такое же сияние, как на исходном природном камне.
